# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

A persistent weather pattern will remain in place for the next few days. There will be a slight chance of thunderstorms across the Trinity Alps each afternoon and evening beginning Saturday and continuing into early next week. Otherwise, the interior can expect above normal temperatures while the coast should anticipate overnight low clouds and fog.

#### **San Francisco Weather:**

The typical summer weather pattern has returned to the region with night and morning coastal low clouds and fog stretching into the valleys and clearing skies in the afternoon hours. Near normal temperatures and dry weather are expected through the weekend and following week.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

Hot temperatures continue with a cooling trend beginning Sunday. A return to Sierra showers and thunderstorms is possible again early to mid-week next week.

#### **Hanford Weather:**

High pressure will continue to bring well above normal temperatures to the central California interior through at least Tuesday with a chance of thunderstorms each day along the Sierra Crest. A surge of monsoonal moisture this weekend will bring an increased threat of thunderstorms to the higher terrain including the Sierra Foothills and the Kern County Desert by Sunday afternoon and evening.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

An upper level high east of the region will keep temperatures above normal through the weekend. Night and morning low clouds will affect much of the coast line through the period. Monsoonal moisture will bring a slight chance of thunderstorms to the mountains and deserts on Sunday, otherwise dry conditions are expected through Thursday.

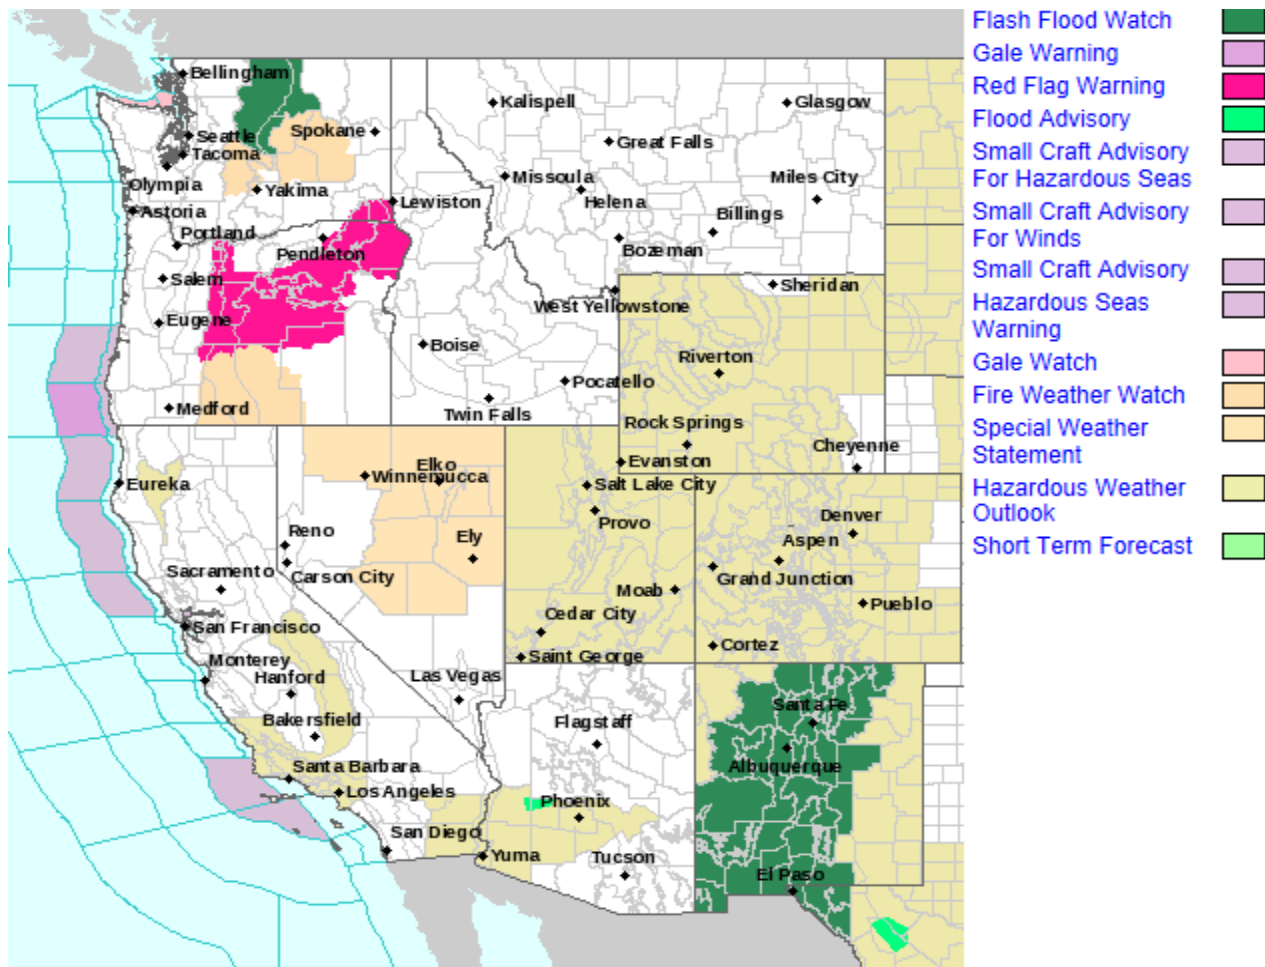

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

Moisture from the southeast will increase through the weekend and combine with low pressure aloft to bring showers and thunderstorms at times to the mountains and deserts. Some thunderstorms could even occur near the coast, especially Saturday through Sunday. Temperatures will be a little lower the next few days, though humidities will be higher. The low pressure system will move northeast out of the area early next week and result in drier weather. Areas of low clouds and fog will occur near the coast most nights and mornings through the middle of next week.

#### **Southeast California Weather:**

There will be a slight chance of thunderstorms this afternoon and evening mainly in the higher terrain of northern Inyo County. Thunderstorm chances will increase area wide this weekend, as deeper moisture and a potent upper level disturbance moves in, with the main concerns being very heavy rain and erratic gusty winds.

# CAL OES ACTIVATIONS

## Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

### Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/15/14 the State Water Resources Control Board passed a new emergency regulation to reduce outdoor urban water use. The regulation makes an exception for health and safety circumstances. Local agencies can ask courts to fine water users up to \$500.00 a day and the SWRCB can fine water agencies up to \$10,000.00 per day. The adopted regulations are expected to go into effect by August 1, 2014 and remain in effect for 270 days.

- Current Reservoir Levels continue to decline. Pine Flat had a 5% decrease from last week. Levels as of July 30: Don Pedro 44%; Exchequer 21%; Folsom Lake 42%; Lake Oroville 36%; Millerton Lake 53%; New Melones 26%; Pine Flat 14%; San Luis 23%; Lake Shasta 35%; Trinity Lake 36%; Pyramid Lake 93%; and Castaic Lake 47%.

### Situational Summary

- **Drought Top Environmental Concern of Californians, PPIC Report Finds:** A newly released survey by the Public Policy Institute of California (PPIC) reveals that drought and wildfires are at the top of the list of public worries about the impacts of global warming. The survey also found that 75% of respondents believe public water agencies should require residents to reduce water use.

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
- The DWR has released a list of unmonitored high and medium priority groundwater basins. As outlined in California's Water Code, some counties and groundwater management agencies in unmonitored basins may be ineligible for water grants and loans administered by the state.
